[About Us] Experience in the MMORPG (Massively Multiplayer Online Role-Playing Game) industry, KOGE's team members have accumulated in-depth knowledge of various genres of role-playing games. Having this kind of experience, and developing them further, we created Empires and experience in the MMO genre. Empires seeks to create a fantasy action RPG that feels like it has not been seen in the world of role-playing games. We are creating a game that immerses players into a mythical world and lets them have a fresh experience. Empires realizes the need for players to create their own character and offers the player a vast world that we have created, where you can enjoy various content together. [News and Notes] ► Character Name Change Many of our communities have asked us to improve the official name of Empires, as it had not been updated since the first expansion. We took the opportunity to make a character name change, and the current name is now the official name of Empires. This change includes the name of the main character, the engine, the logo, the background image, and so on. ► New Version, New Name We are launching the new version, Empires, with the new name, Empires Core. Since this new version, there are many parts that can be improved. In particular, the UI for various settings is still being worked on and the content level is also being adjusted for the increase in the number of players. ► Empire Stone, Use of Special Skill In Empires Core, a new character item, Empire Stone, will be added. This item will allow you to strengthen your class-specific skills with a unique combination effect. Furthermore, the SE custom skill, "Empire Stone" will also be added. The SE custom skill, "Empire Stone", will allow you to use each of your special skills as a party member. Please note that this SE custom skill will be added once Empires Core is released. ► G-Charge Enhancement For this version, we will be preparing new content in the "G-Charge" area, which previously took place in the "Crystal Mountain" area of the above expansion. ► New Features, New Content We will be adding many new features, such as making camera movement for scale, new skin and costume styles, new recipes, new equipment, and the like. Please look forward to seeing these new contents soon.

This game is extremely intense, the story is amazing and the gameplay is good, but the water has some serious problems. The game has an endless world that in itself is amazing but it is slow to load and while I'm waiting for the world to load completely, I have to wait for an hour or two for nothing. As for the water, it's filled with bugs, the map is non functional, and the graphics are very bad. If you want to play a fantasy world (with a vampire) fill with endless level with other characters do yourself a favor and don't play the water. Sadly, at least for me. It is an excellent investment in the development of your game. By simply laying out a foundation for the launch of a landmark product, the game steadily increased the player base. With the ability to access the highest bugs, even if they may appear in public areas of the country, or receive unwanted attention from other key players, in this game, you will enjoy a higher production stability when preparing to advertise the game.

It can be a realistic investment on a large amount of crowd. Unlike the recent game, where successfully released only by a small number of major players (a small number but the number of potential backers has been not small), launch the game, collectively to the public, with many people is a feature that is very rare in the world of games. Especially, so far, after the installation of "Elden Ring" mod, the take-up rate exceeded those cases.

It can be good in reality of the launch of the game. The game was a small amount of a particular success, as
