Temperatures are expected to soar to 90 degrees or more with low humidity, according to the National Weather Service. "Heatwave warnings" are in effect starting at noon Sunday and lasting until 10 p.m. Monday, the agency said. It also warned of possible record-breaking heat. "Be sure to drink plenty of water, stay in the shade and stay cool," the service said. Temperatures are expected to begin rising Monday, reaching the 90s by Tuesday. Wind chills could even reach the 60s. "It's uncomfortable," said National Weather Service meteorologist Jenny Frye of the rising temperatures. "It's going to be hot with no relief." Spokane is still under an excessive heat warning, which means the temperature will be above 97 degrees for an extended period of time and will feel hot to the human body. More: Hot weather may cause more summer weather warnings More: Spokane area is first to hit 102 degrees, public safety emergencies declared Temperatures are expected to reach the 90s every day through at least Monday. "We'll look like a little piece of Las Vegas," Frye said of the heat. Spokane is the first city in the region to experience a heatwave since early June, she said. On Monday, Spokane reached 98 degrees, breaking the previous record of 95 degrees in 1975. But the heat was not so bad at all for Washington's capital city. "It feels like we have had triple digits every single day (since June 14)," said Karen Orchard, who lives in Spokane and works for the Washington Department of Fish and Wildlife. That trend is expected to continue through at least July, when the region is expected to reach triple digits for an extended period of time. "We expect to see temperatures in the mid

**Warrior Guide Hello everyone, here is our Yatagarasu Attack on Cataclysm Warrior guide. This guide has been checked out by me using fairly large amount of Yatagarasu clones so it should give you a decent foothold. As stated before this guide is more geared towards newer players that are getting into Yatagarasu and its CGW. Though if you are already playing a Warrior, look at it as a means to level up your Warrior game. Plus this is a solid addition to the Warrior. If you are unfamiliar with Yatagarasu:Yatagarasu is a game full of fun and a pretty unique take on a roguelike. The game is a battle royale game where you select a cataclysm, meet a group of five clones (forced to look like yourself), and then hop in the arena to kill each other. Each cataclysm is a mob boss that contains several "pets" which can aid in your battle. You can see the pets in the bellow graphic. These pets and bosses change throughout each level. The names of the pets come from characters from Japanese Anime, and they are no different in this game. They each have unique attacks and attributes, and by default their attacks are chained. This means they can be hit by multiple attacks, and then attack again. Multiple hits by itself does not mean much, but if you have a pet that can dual-attack then you can deal serious damage. Starting Level Up Yatagarasu: The starting pet Yatagarasu has a male appearance, has no weapons, and has a background music of death (next time you see him (or her), he will be slowly drowning). He has a passive, as you can see from the below screen shot. Just below, you can see what I mean by a pet having a "passive", which is essentially where the pet has an attribute that can boost your damage (kinda like a buff). If you cannot see the buff, just press [Player] and then clear out Yatagarasu and go look for him again. Chances are you will see a new passive (buffs). Terrii has a set of passive that can attack faster, can do extra damage, or makes you immune to one attack type. Yogami has a set of passive where you are more able to attack, or has a 3 man attack that clears the map of all enemies (3 man attack is called bra**

**An Amazon.co.jp eShop game. A Humble Indie Bundle Bundle(R) 2017 finalist. Winner of "Game of the Year" in the 2016 GameStation Grand Prix. Category: Puzzle PlatformerGlittery, psychedelic, often trippy, but never dull, Nintendo's delightful (or should that be Metroid-like?) 2011 downloadable second instalment Super Smash Bros. Brawl wove careful balances between intense on-screen play, intricate character design and an exceptional soundtrack. Set for a September release on Wii, PlayStation 3, Xbox 360 and Nintendo DS, you might expect to see a sequel packed with that same sense of wonderfulness. But, after finally completing this mammoth game in April, we can confirm that new ideas have not yet been played with. As proof, Super Smash Bros. is even darker and more surreal than its original Wii edition. Whereas the original game was surprisingly relaxed, this new character collection is steeped in an oppressive atmosphere. We're not that far away from a handful of new characters being put to the ultimate test in next-generation Wii U graphics and motion control. That means that a less exciting Super Smash Bros. Wii U is also a possibility. But for now, let's take a look at some of the game's more mysterious facts. Japan is still the most dominant power in the video game industry, even as the industry's dominant power, Microsoft, looks to be falling further and further behind. Super Smash Bros. Brawl has achieved a monumental feat - it has sold more than half a million copies in Japan, making it not just Nintendo's best selling game in the region, but perhaps the best selling game ever for the Wii. In order to have a chance of achieving this awesome success, Nintendo faced a challenge of creating an undeniably Japanese game that could appeal to a Japanese audience while retaining a global appeal. Once again, Super Smash Bros. shows Nintendo's expert abilities in character design and choreography, as well as its unique ability to make visually distinct characters, from Pikachu to Link, that still somehow manage to remain likeable. In Super Smash Bros. Brawl, Nintendo has taken everything that makes the Wii's Mario Super Smash Bros. Brawl really awesome and totally reinvented it. Let's start from the beginning - the original Super Smash Bros. was a masterful marriage of both Nintendo's brightly coloured Mario sidekick and a collection of characters that were meant to be as quirky as possible, as well as conveniently**

Maybe it's the mad scientist who doesn't want people to know he exists, but Manitoba RCMP are starting to get curious as to why somebody out west is using dynamite to create seismographs. When the person is done with the seismographs, or "zonks," as he calls them, he removes the hardened rocks, returns them to where he found them to be placed, covers them back up and waits. When the sun gets too high for the person's liking, he returns to place the dynamite. There has been a lot of speculation about the origins of this kind of behaviour. This is certainly a unique approach to collecting data. Manitoba Wildlife Inc. First day the excitement began at around 8:30 a.m. A river road is normally the ideal landing spot for a boot print or other evidence leading to the accused - so it was a big relief when the normally dry area began to flood in the middle of the night. First seen at about 10 p.m. The first attack on the rock face happened on May 13. The dynamite was placed at the river to collect sediment that was swirling around. That seemed a time-consuming process to hit the data at the rate the sock wants (up to six per second). The person pulled all his socks off and then ripped the left foot half away from his body. The person got the dynamite spread out across the rock before he moved on to a new location around 8 a.m. on May 14. This time the person went to the river about 4 a.m. He placed the dynamite
